

Anna Klymchuk

Data Analyst | Power BI | Bringing Structure to Financial Data through Clear and Automated Reporting

Ukraine (Remote, available worldwide) | Working hours: GMT+2 (flexible for EU/US overlap)
anyklymchuk@gmail.com | +380 67 503 5479

Data Analyst with strong experience in Power BI, financial analytics, and data modeling. 3+ years of experience in building dashboards, working with large datasets, and transforming raw data into clear business insights. Strong background in finance (15+ years), including budgeting, forecasting, and performance analysis. Experienced in handling complex data sources, validating data quality, and supporting business decision-making.

PROFESSIONAL EXPERIENCE

Power BI Developer / Data Analyst

Medical Diagnostics Company (Confidential)

Kyiv, Ukraine (Hybrid)

Nov 2025 – Present

- Designed and developed interactive Power BI dashboards for reporting.
- Automated data preparation and transformation using Power Query and SQL.
- Built structured data models for reporting across multiple departments.
- Processed large datasets (20M+ rows), improving report performance and reliability.
- Consolidated data from multiple sources into a unified reporting layer.
- Delivered KPI dashboards and business insights for operational performance.
- Identified data inconsistencies and implemented data validation processes.
- Gathered business requirements and developed end-to-end Power BI solutions using DAX, Power Query, and data modeling
- Built and maintained ETL pipelines using Power Query, SQL, and Power BI Dataflows

Key Achievements & Impact

Reduced report refresh time by **30–50%** through data model and query optimization
Eliminated report refresh failures, ensuring **~99% stability** of reporting processes
Improved data accuracy and consistency by **30%+** through validation and standardized logic
Built a structured data foundation, reducing reporting errors and inconsistencies by **20–30%**

Power BI Analyst

IGM Support

Canada (Remote)

Feb 2024 – Oct 2025

- Structured and organized raw data from multiple sources for consistent reporting
- Built and maintained data models for financial and operational analysis
- Designed reporting logic for Plan vs Actual, forecasting, and KPI tracking
- Analyzed financial data (P&L, Cash Flow) and ensured consistency across reports
- Developed and maintained Power BI dashboards for business decision-making
- Used SQL to extract, transform, and prepare data from different systems
- Validated and reconciled data to ensure accuracy and reliability
- Identified and resolved data inconsistencies and root causes
- Improved reporting processes and reduced manual work through automation

Key Achievements & Impact

Reduced Power BI refresh time by **30–50%** through optimization of Power Query and data models
Achieved **~99% report stability** by eliminating refresh failures
Improved data accuracy by **30%+** by standardizing calculation logic (DAX, Plan vs Actual)
